PROFESSIONAL SUMMARY

- **4 years** of experience in Software Testing (Manual and Automation) of Web Applications.
- Expertise in working with Selenium Web Driver using **Cucumber** framework.
- Experience on Working with Cucumber for Automation testing Reports.
- Hands on Experience in other frameworks like **TestNG, Junit, and Data Driven Framework**.
- Experience on developing a framework using a design pattern - **Page Object Model**.
- Expertise in working with **GitHub** as my Source Management Tool.
- Have a good knowledge and hands on Experience in handling of Defect Management Tool **JIRA**.
- Extensive Experience on Chrome Driver and Firefox Driver.
- Experience in writing CSS Selectors, Xpath expressions to identify web elements.
- Expert in working in different Testing Methodologies like Agile, Agile – Scrum Model, Waterfall- Model.
- Experience in logging defects using JIRA, performed defect tracking and reporting.
- Good Knowledge in Core Java concepts Collection, Strings and Exception Handling.
- Quick learner with the ability to grasp and learn new technologies.
- Experience in preparing and executing test cases for Client Requirements and Web Application.
- Experience in Web Based Application Testing.

WORK EXPERIENCE

Working as an Software Test Engineer in **Excelacom Technologies, Chennai** for 4 years
(May 2018 to till now).

EDUCATION

Graduated **B.Sc., (Physics) in 2011 at SFR College for Women , Sivakasi.**

PROJECTS

PROJECT 1 :

Client : Avianca
Domain : Airline
Tools : Selenium, BDD Cucumber
Role : QA Automation Engineer

Description:

Avianca is the airline group of eight Latin American airlines, whose operations are combined to function as one airline using a codesharing system. Avianca is the largest airline in Colombia and second largest in Latin America, after LATAM of Chile.

ROLES AND RESPONSIBILITIES :

- Developed the Automation Test Scripts in Selenium WebDriver using Java based on the design pattern Page Object Model for reusability.
- Created Maven Project using Maven build automation tool to create dependencies like jars.
- Triggered POM.XML files using Jenkins, Continuous Integration Tool to generate reports and to trigger periodically.
- Used GitHub, source code management tool for code re-usage, high portability extending scope of Automation Testing.
- Reviewing the Test Reports using Cucumber Framework.
- Project is under Agile environment, I attended daily standup meetings, provided daily status on manual and automation test results. Attended sprint plan meetings to review the user stories and story points.
- Performed automation testing using Maven, GIT Hub and Jenkins. Prepared and execution of test suite using Selenium with Cucumber.
- Prepared and executed Test Cases as per System Requirements and User Stories. Participated in identifying the Test scenarios and designing the Test cases.
- Performed manual testing on some required modules.
- Performed various black box testing Methodologies like functional testing and Regression Testing. Defect Tracking and Reporting, logged defects using JIRA tool and reported it to the developer.
- Developed and executed Test cases, once he fix the defect again retest the defect and report the state of the test case weather it pass or fail to my PO. Usually will send Daily status report and Test cases summary report to my PO.

PROJECT 2 :

Client : Supre

Domain : E-Commerce

Tools : Selenium ad Testng

Role : **Manual and automation**

Description:

Supre pty Limited is an Australian-based chain of apparels exclusively for women owned by Cotton On Group. The company operates around 60 stores across Australia and with worldwide distribution of women fashion accessories, with its head office located in Geelong, Australia.

ROLES AND RESPONSIBILITIES :

- Prepare the **Test scenarios, Test cases, and Test data**
- **Self-review** and **Peer-review** the test cases
- Executing the **Functional, Non-functional** Test cases
- Logging the defects in **JIRA** and track the defects until it gets fixed
- **Retest** the failed test cases and **Regression** Testing
- Preparing the **Test execution reports** for the pass and failed test cases
- Send **daily reports** to the Manager
- Extending my support to Documentation
- Understanding how **Web application** works and its tier architectures
- Involved in preparing the Daily status report and Weekly status report and sharing it with the client and with the management
